ISUZU 4HK1/6HK1 ENGINE PARTS PROFESSIONAL SUPPLIER

ISUZU 4HK1 & 6HK1 engine are widely applied to many truck and construction machinery, such as ISUZU, HITACHI, SUMITOMO, KOBELCO, JCB, KATO, SANY, GMC, XCMG, KOMATSU, CATERPILLAR, JAC. Many customers have large demand to these engine parts in the world.

We produce high quality and stable quantity products processed with original workblank. Following with TS16949 Quality control system strictly, what we can supply are long block, short block, cylinder block, complete cylinder head, cylinder head, crankshaft, camshaft, connecting rod.

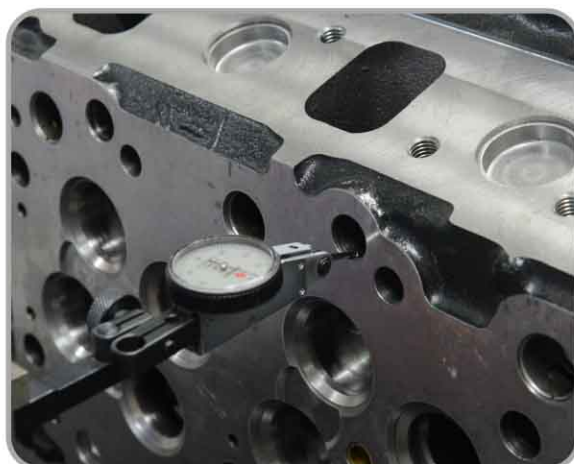

We can develop mold design independently, choose low pressure casting, gravity casting and kinds of casting process. We use advanced CNC equipment to process and perfect testing methods to reach large batch every day.

4HK1 6HK1 HIGH QUALITY CYLINDER HEAD

PRECISION MACHINING

CAREFUL DETECTION

FITTING DETECTION

LEAKAGE TESTING

STRONG PACKAGE

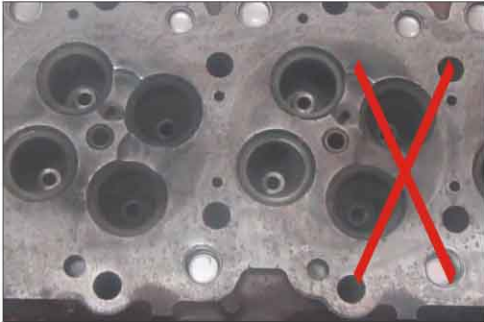

STRONG PALLET

ISUZU 4HK1/6HK1 ENGINE PARTS PROFESSIONAL SUPPLIER

The bottom working surface and valve seat are very important for cylinder head. For good cylinder head, the bottom working surface must be smooth without any lines.

The wooden package is better to protect the casting cylinder head, if it is not strong, it's easy to damage the products. And the steel wooden box is more favoured.

ISUZU 4HK1 CYLINDER HEAD

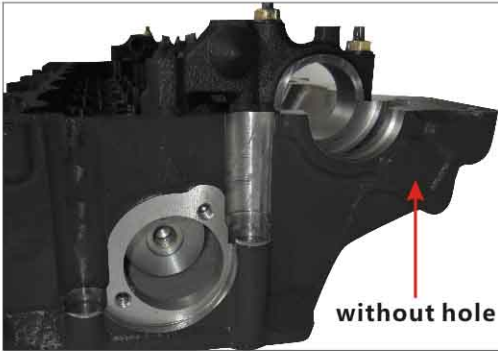

TCM No:130015167
1) with 4mm of induction hole spacing
2) used for engineer truck

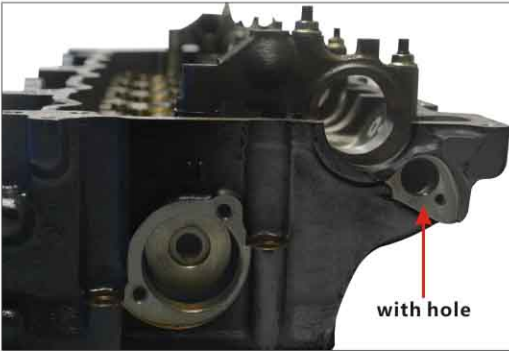

TCM No:130015127
1) with 10.16mm of induction hole spacing
2) used for car

ISUZU 6HK1 CYLINDER HEAD

TCM No:130015171
1) With different material
2) Larger displacement
TCM No:130015165
1) Without camshaft sensor hole
2) Direct injection

TCM No:130015010
1) Electric fuel Injection
